## TOO METAL FOR PUNK - TOO PUNK FOR METAL

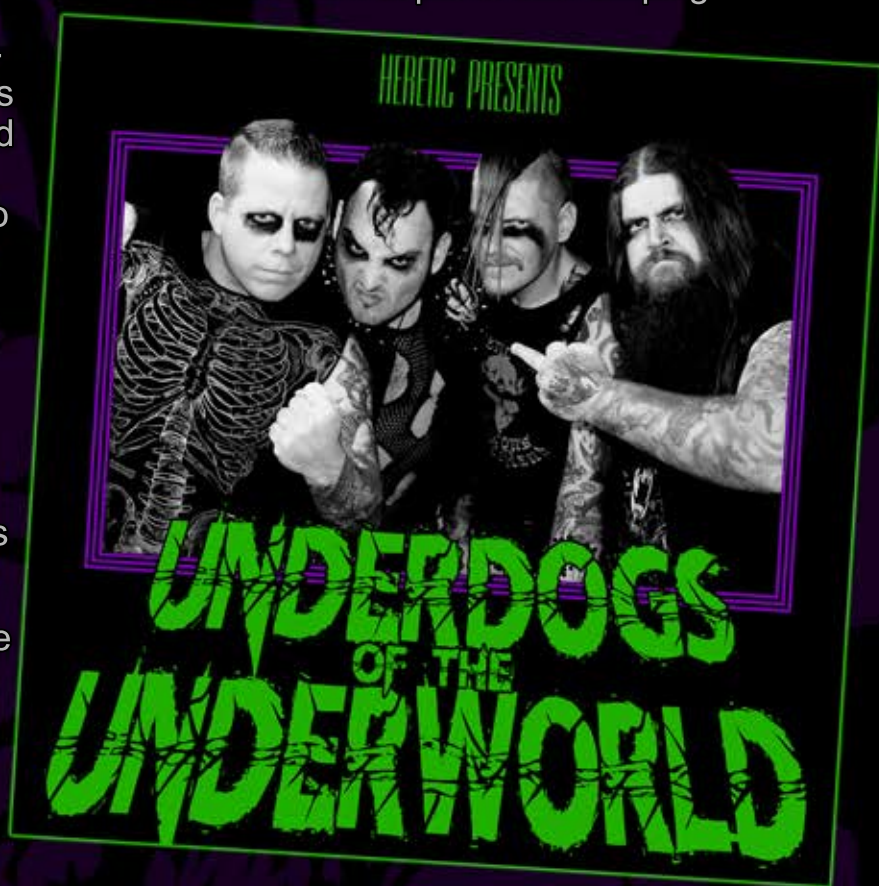

Heretic is a league of their own for 20 years now: no compromises, no pretentious bullshit, just pure filth! This amount of sleaze even makes Venom want to put in their earplugs.

'Underdogs of the Underworld' is Heretic's 5th full-length album. The band has been working hard last year, writing and recording songs. The 10 songs of this album have stood the test: all killers, no fillers!

The band managed to capture their live energy like never before. This record makes you want to fuck, scream, punch and bang your head like a maniac!

Imagine this: Motörhead and the Misfits have an illegitimate son growing up listening to Celtic Frost and Slayer. This record sounds like that kid's first garage band.

'Underdogs of the Underworld' is a wasteland full of creatures that will haunt you until the end of days. Black metal punk aficionados from around the world are getting ready to burn the world.

ARE YOU READY FOR A BLITZKRIEG ON YOUR EARDRUMS?
